

How to Get School Work When Your Child Misses School

This document is to help guide parents and students when a student misses school. This document will help know how to get the missing work. Many teachers either use google classroom or deliver homework to the front office or a combination of both. Please read through this document and view the “Notes” to help guide your questions about missing work.

Please know that if a student is missing 2 days or less of school that they may not be able to pick up work from the front office, and we will just provide the student with additional days to make up the work (this only applies if the student has an excuse note from a doctor or other type of situation that meets the criteria as an excused absence).
